

Healthbox Horizon Scan

With over **7,600 startups** and **245,000 apps** in the market, navigating the digital health landscape is challenging.

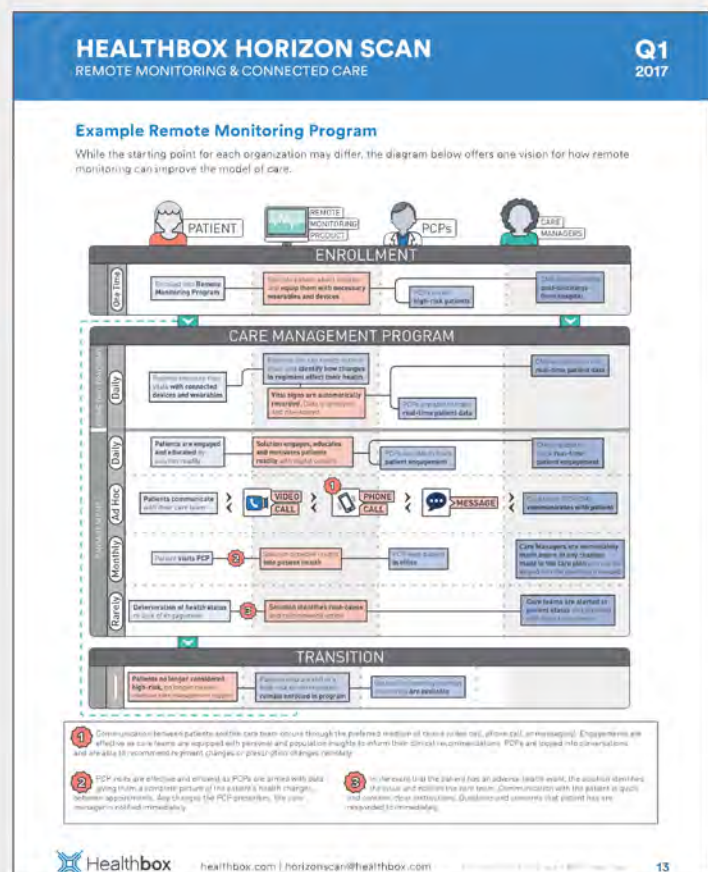

Filter through the noise with Healthbox Horizon Scan

Horizon Scan provides healthcare organizations with a platform to find and evaluate innovative digital health solutions with added confidence and speed. The platform features a repository of company profiles on vetted solutions, comprehensive industry reports, and a community network to engage with other users and the Healthbox team. Horizon Scan de-risks the process by curating high-potential solutions and connecting you with like-minded innovation leaders, paving the path to impact.

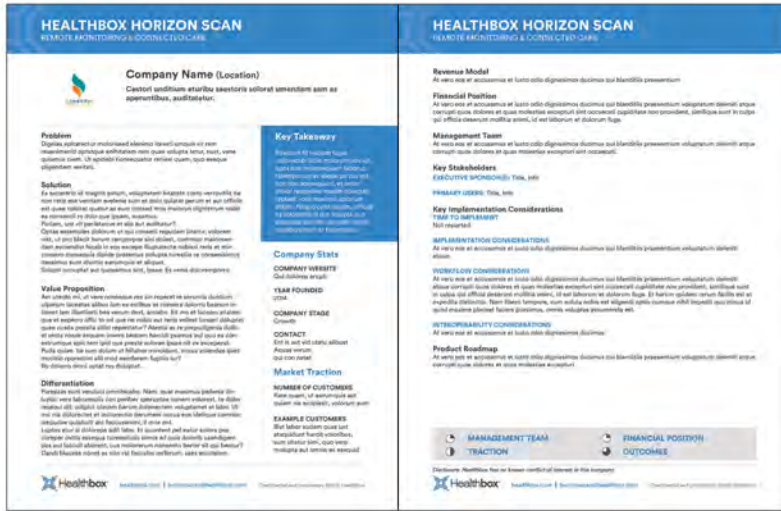

QUARTERLY REPORTS

Reports define innovative areas within digital health. For each area, the reports highlight key success factors, show example programs to solve challenges in controlling costs and improving outcomes, and guide subscribers toward important questions to ask when choosing a solution for implementation.

Healthbox Horizon Scan

COMPANY PROFILES

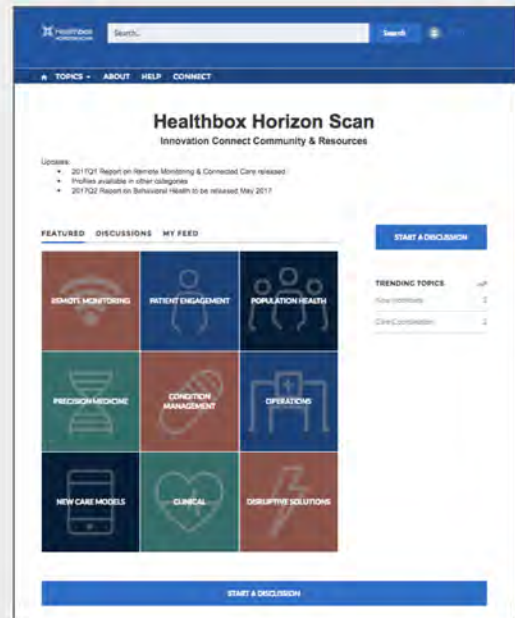

Curated and objective profiles of notable established and early stage companies addressing focus areas such as:

About Healthbox

Founded in 2011, Healthbox helps healthcare organizations innovate from the inside and out. Our products and services advance strategies that support a culture of idea generation, business creation, and entrepreneurial collaboration. Together, our team has evaluated nearly 3,000 early stage companies and engaged with over 160 startups in Studio and accelerator programs. Our demonstrated ability to identify, develop, evaluate, and advance high-potential ideas has helped healthcare organizations build and sustain internal innovation initiatives through workshops, programs, and commercialization projects. Additionally, Healthbox is the general partner of several venture funds, including the Intermountain Healthcare Innovation Fund. We are proud to work with healthcare leaders across the country who share our passion for harnessing and advancing solutions to empower the reinvention of healthcare.
